

## Protecting and Growing the Texas Asphalt Pavement Market

Texas has the largest roadway system in the nation — nearly 700,000 lane-miles in total.<sup>1</sup> Of these, more than 180,000 paved lane-miles are state-maintained, with the rest managed by local agencies, cities, counties, and private owners.<sup>2</sup> No matter how you measure it, Texas leads the U.S. — and while multiple associations represent concrete, **only one statewide association is dedicated entirely to asphalt: TXAPA.**

For more than 80 years, TXAPA has been the voice of the asphalt industry in Texas—protecting your market share, strengthening specifications, and ensuring asphalt remains the pavement of choice. **To continue this work and further grow the Texas asphalt pavement market, TXAPA must increase member dues.** These resources will enhance marketing, education, and member-focused programs that keep asphalt pavement strongly positioned in the marketplace.

### Proposed Dues Adjustment

As you consider this proposal, please bear in mind:

- We have not raised dues in 12 years.
- We’ve expanded staff and capabilities to match Texas’s growth.
- It takes real investment to defend and expand your market.
